

EKYLAXYL

ARNICA-BASED GEL

Description

Arnica-based liniments are essential products for all horse owners. They are great for treating muscle stiffness before and after exercise and a good solution in the event of knocks and bruises.

Purpose

EKYLAXYL is an arnica-based gel formulated by AUDEVARD Laboratories. It is designed for local application to relax muscular areas before or after exercise.

Formula

The EKYLAXYL formula combines the properties of arnica and yarrow with a hyperoxygenated oil base for more effective use of the ingredients. It does not contain any ingredients with a doping effect. Its texture is designed to ensure it can be massaged in effectively, while leaving the hands clean and dry after application.

Our advice

An ideal formula for massages and bruising, EKYLAXYL is a must-have in all grooming kits. Recommend it to all your customers!

Instructions for use

External use. Put a sufficient amount of product in the hand and massage the area to relax. EKYLAXYL can be used once to twice per day in preparation for an effort or recovery. The EKYLAXYL formula does not contain doping ingredients.
