

# ZZEN FLASH

SUPPLEMENT FOR ANXIOUS AND «HOT» HORSES

## Description

Some horses are more sensitive than others to stress caused by training, competitions, transport and changes in their environment. These situations create a one-off increase in the nutritional requirements of the horse which should be offset by additional intake of specific nutrients.

## Purpose

Nutritional supplement to prepare horses for unusual circumstances (transport, a competition, etc.).

## Formula

ZZEN FLASH is formulated with technically pure tryptophan and magnesium, which anxious horses have an increased requirement for. This apricot/peach flavoured formula also includes *Angelica archangelica*.

## Daily allowance

Empty the contents of one syringe into the horse's mouth (or 1/2 of a syringe for ponies under 350 kg) one hour before the start of the event and the night before if necessary. ZZEN FLASH can also be used for periods of 2-4 weeks in the event of a recurring situation.

## Professional format

60 ml syringe- (EAN 3515654024021).

BEHAVIOUR

### Composition per litre

#### Additives (per litre):

- 3c- Amino acids: 3c440 technically pure tryptophan 166,668 mg.
